

Bike to Body Project

1. Pick a body part (**noun**) **This is an example: Heart**
2. Find its function. (**verb**) **This is an example: The heart pumps blood.**
3. Find a device (**a part**) on the bike or in relation to a bike that does the same or similar thing. **This is an example: An air pump pumps air into a tire.**
4. Make a **simile** with the word “like”. **This is an example: The heart pumps blood like an air pump pumps air into the tire tube.**
5. Make **10** different slides with any body system part of your choice. Each slide must have a picture of the **body** part and the **bike** part.
6. Remember to **cite** where you got those pictures. Also if you want to use pictures of your own bike to show each part, *please do this! I love bikes!*
