

Bike to Body Project

1. Use the **Inspirations 8** notes that lists the functions of all the body parts.
2. Pick a body part note.
3. Find its function. (verb)
4. Find something (a part) on the bike that does the same or similar thing.
5. Make a **simile**: The **heart pumps** blood like the **air pump pumps** air into the tire tube.

6. Make 12 body part cards and be ready to stick each one to an actual bike at Mr. Veayo's desk. Be prepared to explain how each part's function relates to the function of the bike part you choose.

* All nine systems must be used.

* Each card must have a picture of the body part, its name and citation.
