

# *Community Cell Directions*

1. Pick five organelles.
2. Find out what the **organelle** does for the cell.(function)
3. Find **something in the community** that does the same job.
4. Compare the function of '**organelle**' to the function of '**something in the community**' using a simile.
5. Use Keynote as a guide to organize your skit.
6. Most original and interesting presentations from each class will be awarded extra plant cells.
